Fedi LAHBIB

Third year engineering student in computer science specialized in Data Science.
As part of my training, I am looking for an end-of-study internship in data science lasting 6 months from the beginning of January 2022.

Béni Khalled, Nabeul, Tunisie

Skills

Machine/Deep learning:
tensorflow, scikitlearn, NLP, computer vision, time series , PCA, CNN, RNN
Big data:
Mapreduce, HDFS, Hadoop, Hive, Spark
Cloud/MLops:
aws sagemaker,MLflow,Docker,Kubernetes
Business Intelligence:
Data Warehouse ETL, powerBI, SQL Server (Microsoft SSIS, SSAS et SSRS).
Database:
MySQL, HBase, Oracle/PLSQL, MongoDB, Redis, Elasticsearch.
Programming languages:
C, JAVA, Python, R, C#, PHP, JavaScript, Script shell.
Web Technologies:
Spring boot, Spring Mvc, Spring Data, JEE, ASP.NET, Laravel 5, Angular 7, Symfony 3, Flask, Django.
Modeling and methodology:
UML, OCL, Merise, CRISP-DM, Scrum.
Other abilities:
Statistical analysis, probability and stochastic method, data analysis.

Certifications

- HCIA AI certification
- Fundamentals of deep learning from NVIDIA Deep Learning Institute.
- Python for Data Science and AI par IBM Machine Learning with Python
- Machine Learning par Stanford University

Languages

Arabic : Native
French : Full Professional Proficiency
English : Full Professional Proficiency

Community life

IEEE Computer Society Esprit
/ Active member 2019-ongoing
Club Google Isim Monastir
/ Technical manager 2018-2019

Center of interest

Camping, Crossfit,Karate

Experiences

Sentinel Data / Data Science Intern
July 2021 - August 2021
Development of a model for categorization of pharmaceutical products by designation and implementation of hybrid sales forecast models for pharmaceutical laboratories.
- python 3, tensorflow, CNN, RNN, NLP, time series, sarimax, ANFIS.

Dotcom / Data Science Intern
June 2021 - August 2021
Development of an automated system for collecting data on offers hotels in Tunisia.
- python 3, selenium, flask, Beautiful Soup, PostgreSQL.

Comunik Crm / Data Science intern
July 2020 - September 2020
Design and implementation of a customizable messenger chatbot..
- python 3, tensorflow, flask, mysql, laravel 5.8.

Just smart / Web & Mobile Developer Intern
March 2019 - May 2019
Development of a web and mobile application for mutual aid between individuals.
- Laravel 5, Angular 7, Ionic 3, MySQL, Rest APi, Angular material.

Education

National Diploma in Computer Engineering specialized in Data Science
- **Private Higher School of Engineering and Technology ,ESPRIT**

Sept 2019- ongoing.
Bachelor of Computer Science
- **Higher Institute of Computer Science and Mathematics of Monastir,ISIMM**

Sept 2016 - June 2019.

Projects

Development of a recommendation system for project risk management.
- spacy,name entity recognition,topic modeling,tf-idf,ontology learning approach

Development of a Face Mask Detection application.
- Deep learning,computer vision, CNN, openCv, tensorflow.

Development of an application dedicated to the Tunisian CGA.
. Centralize data from all insurance companies in the data warehouse and implement a dashboard
. Development of classification models to detect all kinds of fraud in the insurance field.
. Development of a computer vision model to detect if a car is completely destroyed (irreparable cars).
- Deep learning, CNN, Clustering, Classification, ssis, ssms, powerBI, Django.

Development of a time series forecasting model to predict the price of bitcoin.
- Deep learning, LSTM, time series.

Representation of movie content and similarity based on topic extraction from IMDB.
- Scraping, Nlp, nltk, Latent dirichlet allocation, Tf-idf.

Development of a classification model that predicts the unsubscribe status of all customers based on their data.
- Machine learning, scikit learn, flask, knn, logistic regression, xgboost.
